Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)				
Office Action Summan,	10/829,068	CAVALERI ET AL.				
Office Action Summary	Examiner	Art Unit				
	Elli Peselev	1623				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Application/Control Number: 10/829,068

Art Unit: 1623

The disclosure is objected to because of the following informalities: the Serial Numbers of applications on page 12 of the specification, paragraph [0046] and page 18 of the specification, paragraph [0071] have not been set forth.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/829,068

Art Unit: 1623

Claims 57-62 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Malabarba et al ((1999), Drugs of the Future 24(8): 839-846).

Malabarba et al disclose a composition comprising a dalbavancin antibiotic. The claimed composition is anticipated by Malabarba et al. In addition, if there are any differences between the claimed composition and the prior art's composition, the differences would appear to be minor in nature, and the claimed composition, which falls within the scope of the prior art's composition, would have been prima facie obvious from the said prior art's disclosure to a person having ordinary skill in the art at the time the claimed invention was made.

Claims 63-64 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malabarba et al ((1999), Drugs of the Future 24(8): 839-846) as applied to claims 57-62 above, and further in view of Malabarba et al (U.S. Patent No. 5,750,509).

Malabarba et al' Drugs of the Future disclose compositions comprising dalbavancin but do not disclose said compositions comprising a stabilizer or being lyophilized. However, since Malabarba et al'509 disclose dalbavancin compositions in the form of a powder and in combinations with a stabilizing agent (column 28, lines 4 and 12), a person having ordinary skill in the art at the time the claimed invention was made would have been motivated to add a stabilizer to a composition disclosed by Malabarba et al'Drugs of the Future or to prepare said composition in a dry form.

Art Unit: 1623

Applicant's arguments filed August 16, 2006 have been fully considered but they are not persuasive.

Applicant contends that the Malabarba references do not disclose or suggest MAG nor the claimed minimum Bo levels. This argument has not been found persuasive. On page 9 of the specification, paragraph [0041] it is stated that the composition disclosed by Malabarba et al'Drugs of the Future comprises more than 75% of factor Bo. Also, on page 9 of the specification in paragraph [0040] it is stated that dalbavancin often includes MAG. Applicant has failed to show how the MAG level of the reference's composition differs from the MAG level of the claimed composition. The MAG level of the reference's composition is seen to be inherently the same or very closely related to the MAG level of the claimed composition.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/829,068

Art Unit: 1623

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Elli Peselev whose telephone number is (571) 272-

0659. The examiner can normally be reached on 8.00-4.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Shaojia Jiang can be reached on (571) 272-0627. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
